Da Chang	Disch Windmill		10.01

(*) Due to MV Argenmar Mistral stoppages until tonight it seems to be very difficult for MV Algol to complete operations before MV Fortune Tiger arrival at roads. For this reason Algol's berth can also be moved to Site N° 3 but she should have to wait for MV Sevgi departure.

(**) Under expansion - Port Administration informed there will not be cuaseway reparation stoppages while MV Da Ji is under windmills dishcarging operations.

(***) Passenger ships have priority berth - PV Eclipse berthing was confirmed because 2 tug boats will be arriving in order to provide assistance to pax vessels while these vessels stay alongside Those tug boats would stay at Puerto Madryn till end of december while Muelle Piedrabuena extension should be finished.

Port administration of Alte Storni pier informed that due to the expected congestion on Site N° 3 the priority on berthing will be given in accordance to the vessel's arrival at roads for general cargo+full contianers.

Passenger ships have priority proceeding directly to the pier.

All vessel announced subject to change
